THE MOBILE WORKSHOP MOUNTING STAND FOR E-BIKES, CARGOBIKES, BICYCLES

The e-Bikelifter BM-60 from by,schulz is a development with the company Hovmand the specialist for mobile lifting systems. The solid, Danish-made assembly stand is designed for bicycles, e-bikes and cargo bikes up to 60 kg. It meets our demand for sustainable, innovative products.

Thanks to the integrated rechargeable batteries and the industrial transport rollers, the system convinces as a mobile, mains-independent lifting device in professional workshop quality.

The e-Bikelifter thus combines many practical features and is the perfect new acquisition to meet the demanding requirements in the bicycle service sector.

External charger

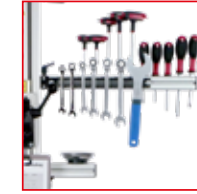

FOR E-BIKES, CARGOBIKES AND BICYCLES

- Mobile use due to integrated transport wheels
- Wireless battery mode incl. charger
- Sensitive sensor foot switch with stop system
- Incl. base mounting plate with universal mounting for clamping arms from VAR®, Feedback Sports® and Parktool®
- Fully charged, a 30kg e-bike can be lifted approx. 80 times
- EU production / CE mark

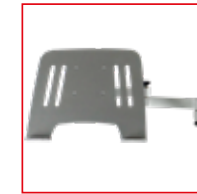

BOTTLE HOLDER

Maintenance spray or brake cleaner can be placed safely and within easy reach in the bottle holder, which is attached to the e-bike lifter via sliding blocks.

TOOLHOLDER

The tool holder can be rotated away from the work area to the rear if required.

DISPLAY HOLDER

A service laptop or tablet can be placed on the display holder.

BASE MOUNTING PLATE

The universal clamping arm mount with an inner \varnothing of 50mm allows the use of many commercially available clamping arms.

TRANSPORT WHEELS

The entire lift can be easily moved by one person using high-quality transport wheels.

FOOT SWITCHES

Two foot switches integrated in the steel base plate allow easy lift operation by foot. Thanks to the stop system, safe, stepless lifting and lowering of the bike is possible as much as possible.

* Optional: with VAR® or Feedback Sports® clamp
